Macro Bin
16 Series

The 16 Series bins are made with nonporous, injection-molded plastic which reduces the risk of product damage from pests, bacteria, or pathogens. The smooth, durable surfaces are easy to clean and can stand up to heavy day-to-day use, season after season.

**Features**

- Rounded corners and smooth surfaces mean fewer scuffs, abrasions, and cuts on your product. Risk of contamination is reduced because there are fewer places for unwanted particles to hide.
- FDA-approved materials are certified safe for use with food products, eliminating many HACCP problems associated with wood bins.
- Splinter-resistant plastic delivers reduced maintenance costs, fewer injuries to workers, and less damage to your product. Bin repairs are inexpensive with hot air welding.
- Nonporous surfaces won’t absorb water or dehydrate your product like wood bins, and they provide a constant tare weight throughout their use.
- Easy to sanitize MacroBins keep cleaning costs to a minimum. A high-pressure wash removes most debris; a nonabrasive brush can dislodge any remaining items.
- Lightweight construction reduces shipping costs and makes MacroBins easier to move; the direct load corner posts and interlocking foot design make them safer to stack — up to 9 high.
