

Shipper-Bin

Hybrid 44

The Shipper Bin is an exceptional ultra-lightweight international shipping container that can replace wasteful cardboard or wood alternatives. Made from FDA-approved materials, the bin is designed to maximize international shipping efficiencies both when the bins are full of product and when they are disassembled and returned empty.

Disassembles Easily for
Efficient Shipping

Features

- Durable, Injection-molded plastic pieces are ultra-lightweight, and fit together securely
- Quick-snap assembly or disassembly
- Nestable baskets and stackable bases allow for maximum use of the space within a 40' HQ container and achieve a 4.7 to 1 return ratio
- Recyclable, FDA-approved materials are certified safe for use with food products and maintain a high residual value at the end of the bin's life cycle
