

Shipper-Bin

Hybrid 1212

The Hybrid 1212 Shipper Bin is an exceptional ultra-lightweight shipping container that can replace wasteful cardboard or wood alternatives. Made from FDA-approved materials, the bin is designed to be strong with a load capacity of 1,102 lbs. This extremely durable bin can also be stacked high with heavy loads, secured by lugs that prevent the bottom of one bin from coming into contact with the contents of the bin below it.

Features

- Softer walls with all rounded edges, and less sharp angles; better than any traditional plastic bin
- Smooth soft surfaces to protect fruit
- Durable FDA-approved plastic
- New column design absorbs and recoils any impact, instead of resisting impact and breaking
- Smart design keeps base from deflecting, and protects content
