<sup>(1)</sup>Rated racking capacity is for standard edge racking where pallet is only supported by two points at the edges. Racking capacity for other types of racks will be different. Nominal specifications subject to change without notice. Product performance characteristics vary with application.

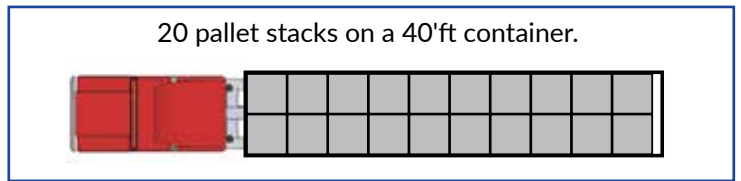

<sup>(2)</sup># In A Stack: LTL (Less Than Truckload) = is based upon 96" height of standard LTL carriers. FTL (Full Truckload) = is based upon height of standard 53' trailers.

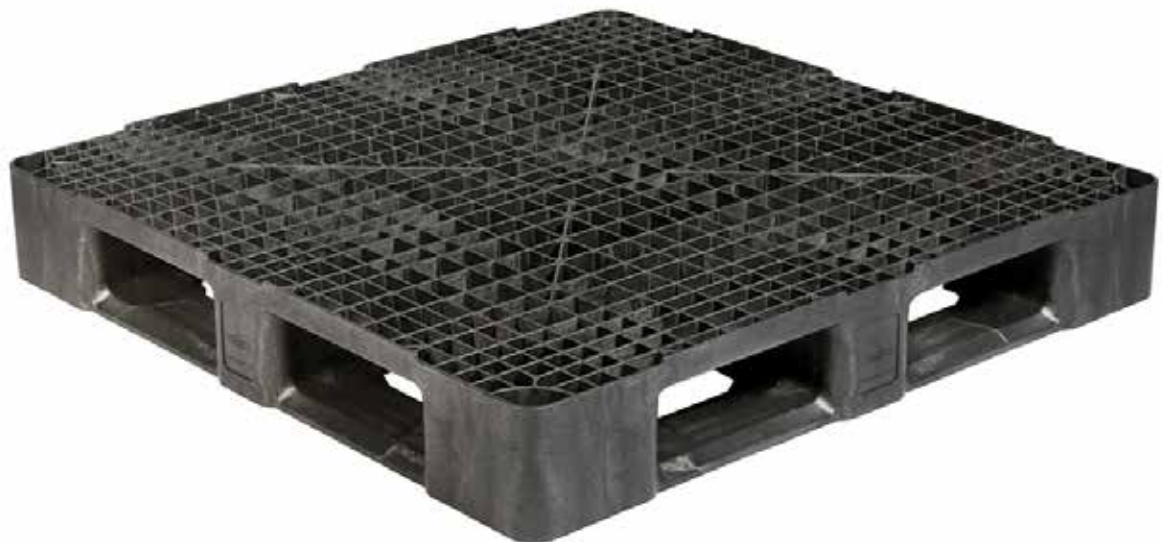

Single-piece design won't cause any separation during transit.

Ideal for bulk bag and drum shipping. Rigid design, great for conveying and for racking applications.

Square pallet footprint optimizes ocean container shipments.
