

Macro 48FV

Plastic Agricultural Bin

SPECIFICATIONS	
Item #	48FV
Exterior Dimensions	48" x 48" x 52.5"
Interior Dimensions	45" x 45" x 46.5"
Load Capacity (ft³)	54.4 ft³
Load Capacity (gallons)	407 gallons
Load Capacity (liters)	1540 liters
Load Capacity (lbs)	3,000 lbs
Weight	180 lbs
Truckload Quantity (FTL ⁽¹⁾)	52

Dimensions assume tolerance of 1/4". Volume capacities assume tolerance of 5% and tare weights assume a tolerance of 4% unless noted otherwise. Ambient temperature approximately equal to 75°F.

⁽¹⁾ FTL = Full Truckload - based on 53' standard trailer.

The Macro 48 Vented bins are the worlds largest fixed-wall, high-pressure, injection-molded bin, replacing 4x4x4 foot metal, corrugated, or wood containers. Used for food processing applications and storage, the smooth, nonporous surfaces of these bins help to reduce the potential for cross contamination.

Features and Benefits

Rounded corners and smooth surfaces mean fewer scuffs, abrasions, and cuts on your tender fruits. Risk of contamination is reduced because there are fewer places for unwanted particles to hide.

Multiple ventilation slots in the sides and base facilitate the use of thermofogging, reduce heat absorption, and help your products cool down quicker in the hydrocooler.

FDA-approved materials are certified safe for use with food products, eliminating many HACCP problems associated with wood bins

Lightweight construction reduces shipping costs and makes MacroBins easier to move; he direct load corner posts and interlocking foot design make them safer to stack – up to 10 high.
